

Maintenance-free portable Ag/AgCl referent electrode for seawater.

Maintenance-free portable Silver/Silver Chloride (Ag/AgCl) referent electrode for seawater, for monitoring Cathodic Protection systems in seawater.

GENERAL INFORMATION:

- **Dimensions:** 380x31 mm (Length x Diameter)
- **Material:** ABS and Ag/AgCl probe
- **Service Life:** Minimum 30 years
- **Maintenance:** None
- **Certified Potential Range:** +/- 5 millivolts compared to pH standard 4-9
- **Working Temperature:** 32°F to 176°F (0°C to 80°C)
- **Cable:** 5 meters, 1x1.5 sq mm with silicone coating
