

Fiberglass Cabinet AUV 62/70-P Series

A technical data sheet for a meter cabinet, especially for large entities like ENEL (the main Italian electricity company) and ATTR. FS (likely referring to "Ferrovie dello Stato" or the Italian State Railways, or possibly a specific type of railway application), will contain very specific information. Since this is not a product with a single, universal data sheet, and the specifications depend on the type of installation (e.g., residential, commercial, industrial, railway signaling), a general answer will need to be provided based on the common characteristics of these cabinets.

The complete unit consists of an AUV 62 series cabinet and a base, part number 286041.

Dimensions: W= 714 H= 1210 D= 270 mm.

Technical Specifications

- Material: SMC (fiberglass), RAL 7001 gray.
- Flame resistance: UL 94 class V0, according to standard.
- Resistance to tracking currents: PTI 500, according to IEC 60112 standards.
- Ingress Protection (IP rating): IP44, according to CEI EN 60529 standards.
- Impact resistance: 20J, according to CEI EN 60439-5 standards.
